ResMed announces the release of a brand new AI-powered CPAP machine

Top Story

What is new?

ResMed announced a new AI-powered CPAP machine, named the [AirIntell™ Adapt](#), that will include all the thrills of artificial intelligence technology. Over the years, the staple AirSense series' have been made with the needs of those who struggle with sleep in mind. Millions of people have a form of sleep apnea, COPD and other chronic diseases that affect their quality of life. The AirIntell™ Adapt joins ResMed's vast portfolio of CPAP systems to support these people and their needs. From high-level adaptation to fast and accurate decision making to comprehensive reporting, the new machine is top-of-the-line and ready to adjust to the unique patient profile of every user.

Inside scoop: The evolution and ongoing development of artificial intelligence-focused technologies invigorated ResMed to start work on the AirIntell™ Adapt in 2021. "We are always striving to match our product offerings with the latest technology to make sure our customers have access to the best of the best and, right now, that is artificial intelligence," said [Lucile Blaise](#), President of Sleep and Respiratory Care at ResMed. "At ResMed, we believe every patient has individual needs so, the AirSense 12 Series, and the AirIntell™ Adapt, take all the greatest parts of our previous AirSense series' to make something more effective for those seeking a seamless sleep experience."

From the outside: A patient participating in a clinical trial had nothing but good things to say. "I feel like the AirIntell™ Adapt really made my sleep the most seamless it has ever been. I loved that I could wake up feeling actually well rested." The clinical trials also saw that the AirIntell™ Adapt was quick in its adjustments to sleeping patterns, was compatible with existing tubes and masks and delivered simple reports on sleep patterns through the myAir app.

Where is it?

The AirIntell™ Adapt will be available for purchase worldwide, in all 140+ countries ResMed services, on December 11th through resmed.com/sleep-devices/airintell-adapt/.

Case study: Home Helpers uses MatrixCare to ensure quality of life for all patients

MatrixCare, one of ResMed's principle SaaS solutions for facility and home-based facilities, was taken on after Home Helpers were seeking a solution to their outdated, legacy technology.

Home Helpers was expanding by a larger margin than they had anticipated but when their original SaaS could no longer support them, they started the search for a new long-term solution. ResMed was able to swoop in and assist them.

MatrixCare has been able to supply Home Helpers with a central hub for senior living care, home health, life plan communities, other hospice services and more.
